**Claim Rejections - 35 USC § 112**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 4, applicant claims a solder "dipping" layer. Similarly, in claim 4, line 4, applicant claims an "ultrasonic" solder "dipping" layer. "dipping" (of claim 1) and "ultrasonic dipping" (of claim 4) are usually process step by which solder layer is obtained. Here, as a product limitation, it is not clear at all as to what exactly applicant intending to claim. Is applicant simply intending to claim ---solder layer--- obtained by dipping layer or ultrasonic dipping layer? Is the solder layer structurally different when obtained by these process steps? if so, applicant needs to claim such different structure in positive product limitations. From reading the given specification and viewing the drawings, the examiner cannot ascertain as to what exactly the applicant is attempting to claim. Dependent claims are indefinite for the same reasons since by their dependencies, it incorporate the same deficiency as their parent claim.

Regarding claims 1-8, claims 1-8 are informal (see rejection of claims 1-8 under 35 USC 112, second paragraph) that no meaningful examination on the merits of the claims can be undertaken at this time. See MPEP 702.01.
